BEYOND THE BREACH

PLEXUS TECHNOLOGY

How Effective Is Your Incident Response Plan?

In the face of sophisticated threat actors, a foolproof incident response plan is your best defense.

Follow these steps to make your response plan effective:

Preparation
Identify critical assets, create a documented response policy and ensure all employees know their roles in safeguarding your digital fortress.

Detection and identification
Continually monitor your entire infrastructure to detect and identify threats before they escalate.

Containment, eradication and recovery
Isolate affected systems, eliminate the root cause of the incident and restore the impacted areas to their normal state.

Post-incident analysis
Document the lessons learned and implement proactive measures to prevent incident recurrence in the future.

Continual improvement
Revisit and update your plan regularly to keep it relevant and ensure its effectiveness.
